
Vegetarian food in Spain?

Posted by lovejojo - 2009/10/22 09:41

I know Spain has some excellent cuisine and most of it contains sea food or meat, but are there many dishes without any meat? I'm vegetarian and have had a hard time finding meatless dishes in Spain.

For the best vegetarian food in Spain, try not to miss Madre Tierra in Toledo.

Vegetarianism can be an admittedly difficult feat in ham-loving Spain. The country has had an undeniably long, proud love affair with meat for as long as anyone can document or remember. (Just look in on any Museo del Jamón location for proof.)

Hello. Guys...

I am also vegetarian, but according to the place I can have some sea food also.
Thank you.

You are in luck when it comes to this request during your vacation to Spain. When you go to almost any restaurant in Spain, you will find that they will offer a few vegetarian dishes. They all do this now so they don't lose you to their competition.
